AR-661U Installation

721-H with 2 pcs of 661U for two-door anti-pass-back

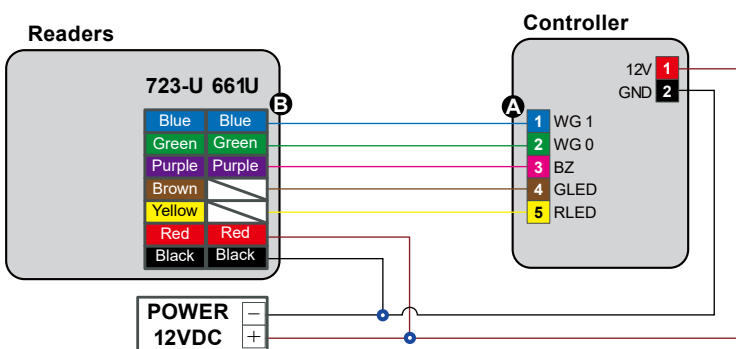

※ Minimum distance between AR-661U & other proximity reader should be over 200cm; otherwise, both readers might interfere each other.

Improvement of RF interference for 2 pcs of 661U

AR-723-U/AR-661U Diagram

※ When the distance between two AR-661U readers is less than 6m (recommended value), the sensing distance will be shortened. However, you can use this method to avoid interference.

※ No 661U needs to connect to LED
